

WIND / SOLAR / BALANCE OF PLANT

RENEWABLE ENERGY INTELLIGENCE.

Connected evidence from development and construction through operation and re-inspection.

SPECIALIST CAPABILITY / 2026

V3 NAMIBIA

DECISION-LED DELIVERY

WHAT DECISION MUST THE EVIDENCE SUPPORT?

01

DEVELOP

Terrain, constraints and engineering-ready survey evidence.

02

BUILD

Progress, quantities and time-stamped construction records.

03

VERIFY

As-built checks, commissioning evidence and handover support.

04

OPERATE

Condition intelligence for generation and balance-of-plant assets.

CONTROLLED EVIDENCE

Capture, analysis and reporting are planned as one workflow.

Scope, timing, outputs and client access are agreed before mobilisation.

WHAT THE PROGRAMME CAN INCLUDE

CAPTURE THE RIGHT EVIDENCE LAYERS.

METHOD SELECTED AROUND THE ASSET AND DECISION

01

SITE SURVEY

- LiDAR and photogrammetry
- Terrain and surface models
- Contours, volumes and orthomosaics

02

SOLAR

- RGB and thermal inspection
- EL testing support
- Module-linked findings

03

WIND

- External blade inspection
- Internal blade and LPS support
- Turbine and balance-of-plant evidence

WHAT THE CLIENT RECEIVES

A DELIVERY PACK BUILT TO BE USED.

01 SURVEY AND ENGINEERING DATASETS

02 ASSET-LINKED INSPECTION FINDINGS

03 PRIORITISED REPORTING

04 SECURE CLIENT DATA ACCESS

SECURE CLIENT ACCESS

Approved files can be shared through the V3 Namibia client portal.

Access is linked to the client and project, keeping delivery organised and controlled.

DISCUSS THE PROGRAMME

START WITH THE ASSET, SCOPE OR DECISION.

We will help define the right methodology,
evidence and delivery format before mobilisation.
